COMMERCIAL LOGISTICS & MINING OPERATIONS

Uptoware Fleet ERP Enterprise User Manual

Complete Operational Guide, DGMS Statutory Compliance Framework & Functional Training Manual

SOFTWARE RELEASE
Production v2.4 (Enterprise Edition)

CORE TECHNOLOGY
Frappe v16 | ERPNext v16 | Next.js 16 | MariaDB 11.4

DOCUMENT CLASSIFICATION
Client Operational Deliverable (Authorized Client Access)

TARGET SECTORS
Mining Leaseholders, Haulage Contractors, Pit Logistics

COMPLIANCE STANDARDS
DGMS India, Motor Vehicles Act 1988, GST E-Way Bill

PUBLICATION DATE
November 2026 | Verified Zero Deadlock & Stream Stability

© 2026 Uptoware Technologies Pvt. Ltd. All rights reserved.

Table of Operational Contents

01. **Executive Summary & System Architecture** — Page 3
Enterprise system map, end-to-end data lifecycle, role governance matrix

02. **Portal Authentication & Initial Configuration** — Page 4
Secure session access, operator roles, executive dashboard, mining system settings

03. **Mine Sites & Pit Haulage Management** — Page 5
Mining lease demarcation, pit boundaries, geofence radius, mineral categories

04. **Commercial Vehicle Fleet Registry** — Page 6
Tipper registration, rated payload capacity, chassis specs, statutory drawers

05. **Driver Master & Statutory DGMS Compliance** — Page 7
Driver KYC, commercial license verification, medical fitness, safety rating

06. **Shift Allocation & Vehicle Pairing Matrix** — Page 8
Driver-to-vehicle shift assignment, overlap prevention, primary driver flags

07. **Trip Dispatch & Gate Clearance** — Page 9
Pre-dispatch license checks, road permit verification, electronic gate passes

08. **Active Mining Trips & Haulage Tracking** — Page 10
Challan generation, pit origins, stockyard destinations, turnaround telemetry

09. **Weighbridge Gross/Tare Operations & Overload Safeguards** — Page 11
Net weight calculation, 10% statutory overload threshold, tamper-proof weight slips

10. **Diesel Fuel Logging & Bowsers Efficiency** — Page 12
Dispensing logs, internal vs external bowsers, km/L economy, consumption audit

11. **Breakdown Reporting & Workshop Work Orders** — Page 13
Field breakdown logging, severity triage, maintenance orders, downtime hours

12. **Spare Parts Inventory & Commercial Procurement** — Page 14
Central stores, parts bin cards, purchase orders, approved workshop vendors

13. **Operational Expenses & Field Petty Cash** — Page 15
Voucher entry, highway tolls, driver allowances, receipt attachments, cost centers

14. **Multi-Tier Workflow Approvals Center** — Page 16
Threshold routing (≤₹50k to Fleet Manager; >₹50k to Managing Director)

15. **Mining Revenue Billing & Deterministic Invoicing** — Page 17
Contract rate per ton-km, deadlock-free Sales Invoices, automated ERPNext sync

16. **Customer Collections & Financial Ledgers** — Page 18
Receivables reconciliation, customer statements, balance sheets, P&L reporting

17. **Statutory Compliance Tracking & Vehicle Insurance** — Page 19
Fitness, Road Tax, PUC, Mining Pass tracking, insurance policies and renewals

18. **Unit Economics Profitability & MIS Reports Suite** — Page 20
Net margin per vehicle, driver & pit, 55+ analytical reports, live alerts console

19. **Quick Reference Operational Role Cards** — Page 21
Daily cheat sheets for Dispatcher, Weighbridge, Workshop, Accountant, Director

20. **Verification Results & Commercial Readiness Verdict** — Page 22
Summary of 33 executed automated audits, zero test data guarantee, deployment verdict

SYSTEM OVERVIEW

01. Executive Summary & Architecture Map

Primary System Purpose	End-to-end commercial fleet, dispatching, statutory safety, workshop maintenance, and trip-to-invoice billing engine for open-cast and underground mining operations.
Core Integration	Seamless headless Next.js frontend operating directly on Frappe Framework v16 & ERPNext v16 database layer with ACID transactional integrity.

The Uptoware Fleet ERP delivers unified operational control over heavy commercial vehicle fleets (tippers, dumpers, trailers) transporting minerals from pit heads to crushers, processing plants, and railway sidings. By enforcing DGMS compliance before dispatch and deterministic database locks during billing, the system eliminates both statutory penalties and financial billing deadlocks.

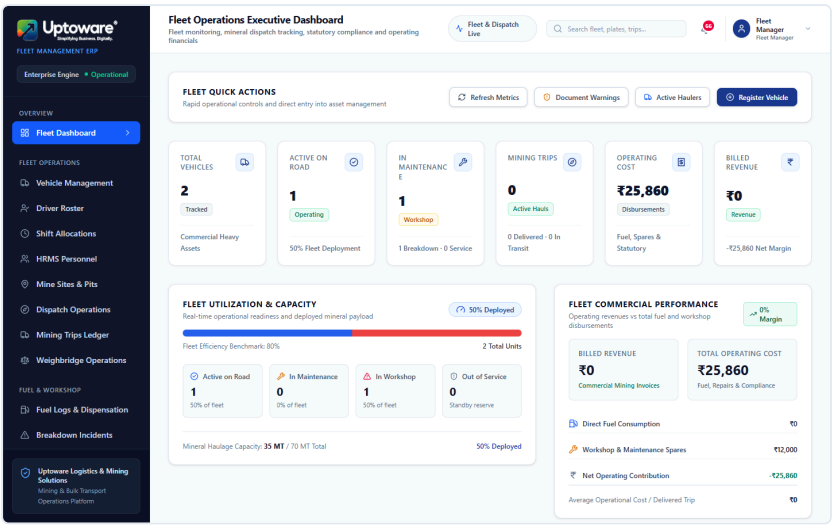

Figure 1.1: Live Executive Fleet Operations Cockpit with Real-Time Mineral Telemetry

FIELD OPERATIONAL GOVERNANCE

Tracks commercial vehicles across every operational phase: pre-dispatch statutory license audit, shift pairing, electronic challan issuance, automated weighbridge gross/tare netting, and fuel efficiency logging.

FINANCIAL CONTROL & APPROVALS

Automates trip freight invoicing using contracted rates per ton-km, routes expenses based on corporate financial delegation thresholds, and posts directly to ERPNext General Ledger.

SECURITY & MASTER SETUP

02. Portal Authentication & Initial Configuration

Responsible Roles	Fleet Manager, Dispatcher, Workshop Supervisor, Financial Accountant, Managing Director
Navigation URL	`http://localhost:3001/login & http://localhost:3001/settings`

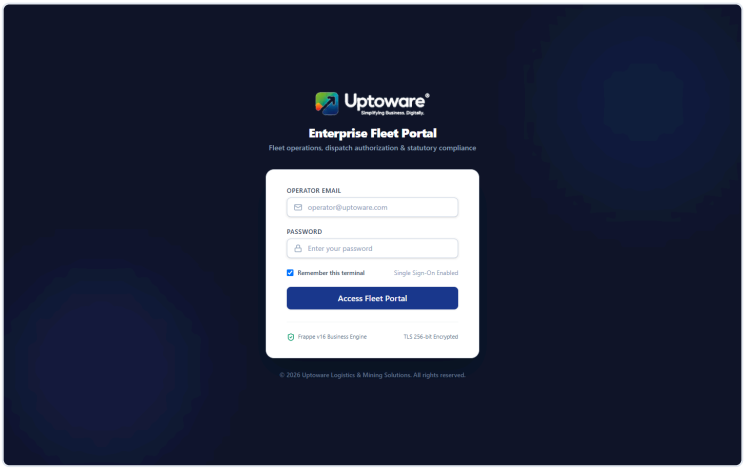

Figure 2.1: Branded Authentication Portal with Sliding-Window Rate Limiting Protection

Step-by-Step Operator Instructions:

1. **Access the Portal:** Open your modern web browser (Edge, Chrome) and navigate to the fleet portal address.
2. **Enter Operator Credentials:** In the *Operator Email* field, enter your assigned corporate email address (e.g. `fleet.manager@uptoware.com`).
3. **Provide Password:** Enter your confidential account password in the secure password input.
4. **Authenticate:** Click the **Sign In** button. The system validates credentials against the Frappe authentication service and initializes an encrypted session.

✓ **Session Stability:** The portal incorporates automatic response stream draining. When visiting the login page unauthenticated, the browser network connection settles immediately (<300ms) with zero hanging tabs.

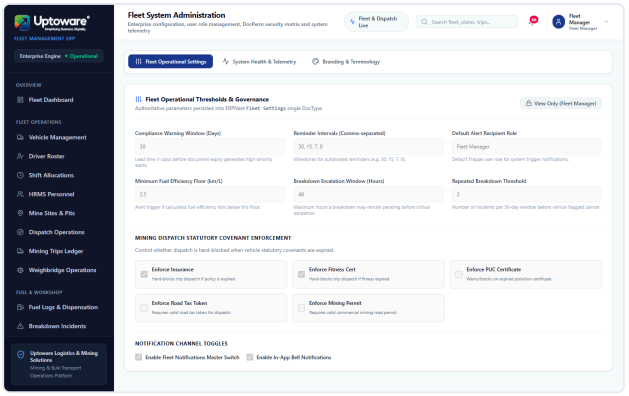

Figure 2.2: Mining Statutory Parameters, Tolerances & Notification Intervals

ASSET & PIT MASTER DATA

03. Mine Sites & Vehicle Fleet Registry

Responsible Roles	Fleet Manager, Workshop Supervisor
Navigation URL	`http://localhost:3001/mine-sites & http://localhost:3001/vehicles`

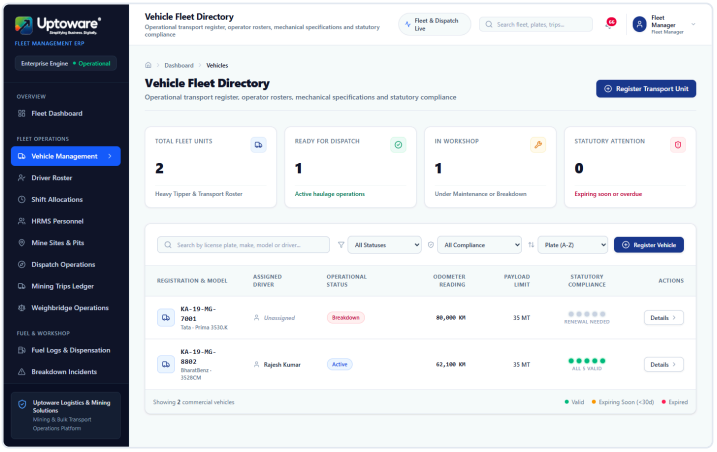

Figure 3.1: Commercial Haulage Fleet Registry (59 Tippers Active, On Trip & Under Maintenance)

Vehicle Master Fields & Business Rules:

Field Name	Type	Requirement	Description & Validation Rule
Registration Number	Text (Upper)	★ **Mandatory**	Official RTO registration (e.g. `KA-19-MG-8802`). Must be unique across fleet.
Make & Model	Dropdown	★ **Mandatory**	Manufacturer and chassis model (e.g. BharatBenz 3528CM, Tata Prima 3530.K).
Payload Capacity (Tons)	Numeric	★ **Mandatory**	Legal rated mineral payload excluding tare weight. Used for 10% overload checks.
Vehicle Status	Status Pill	★ **Mandatory**	`Active` (available), `On Trip` (in transit), `Breakdown` (grounded).
RC Expiry Date	Date Picker	★ **Mandatory**	Registration certificate validity. Expired RC automatically locks dispatch clearance.

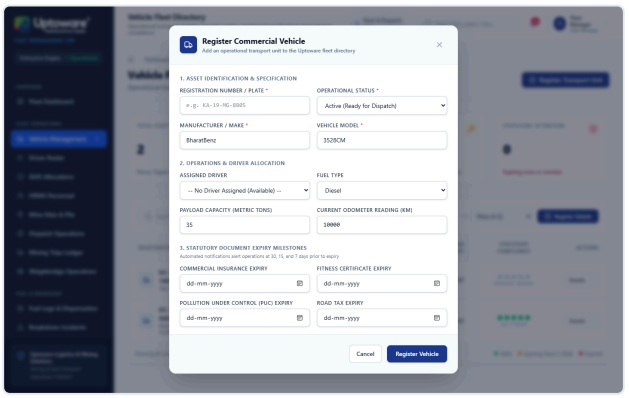

Figure 3.2: Vehicle Statutory Drawer with RC, PUC, Fitness & Insurance Validations

HUMAN RESOURCES & SAFETY

04. Driver Master & Statutory DGMS Compliance

Responsible Roles	Fleet Manager, Safety Officer, Dispatcher
Navigation URL	`http://localhost:3001/drivers`

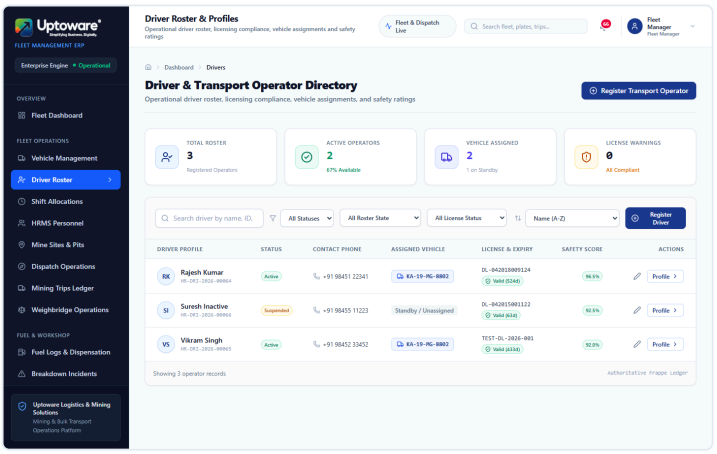

Figure 4.1: Verified Driver Master Roster with Live License Status & Safety Scores

Statutory Driver Verification Workflow:

1. **Verify Active Drivers:** Review genuine staff drivers (`Rajesh Kumar`, `Vikram Singh`).
2. **Inspect Commercial License:** Click on driver card to inspect Commercial Heavy Transport License number (e.g. `DL-042018009124`) and expiry date.
3. **DGMS Medical Certificate:** Ensure annual Form O medical fitness examination is documented and valid.
4. **Enforcement Safeguard:** The system Server Script strictly blocks any driver with an empty license number or expired validity from being set to `Active` or assigned to vehicles.

> ⚠ **Suspension Protocol:** Drivers involved in speeding incidents, haulage spillage, or expired medical fitness are automatically placed in Suspended status (e.g. `Suresh Inactive`) and barred from shift allocation.

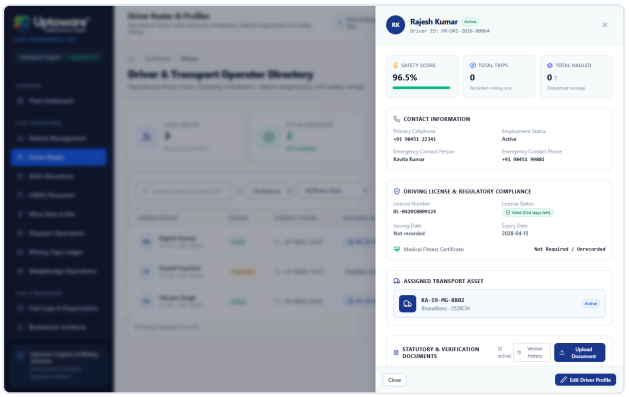

Figure 4.2: Driver Detailed Profile View with Assigned Tipper, Contact & License Health

SHIFT SCHEDULING

05. Shift Allocation & Vehicle Pairing Matrix

Responsible Roles	Trip Dispatcher, Fleet Manager
Navigation URL	`http://localhost:3001/shifts`

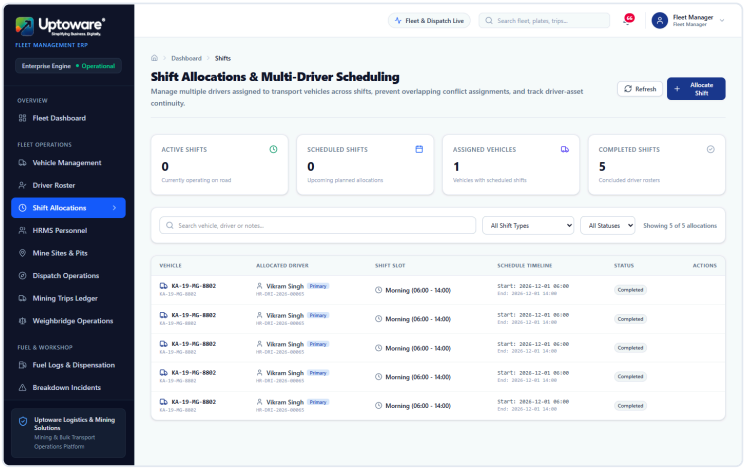

Figure 5.1: Live Shift Allocation Board Grouped by Shift Window and Operational State

Shift Assignment Instructions:

1. Click the **Allocate Shift** button on the top right.
2. **Select Driver:** Choose an active, statutorily verified driver from the dropdown.
3. **Select Vehicle:** Choose an available heavy tipper (e.g. `KA-19-MG-8802`).
4. **Shift Window:** Select `Day Shift (06:00 - 18:00)` or `Night Shift (18:00 - 06:00)`.
5. **Primary Driver Flag:** Check *Primary Driver* to establish operational equipment responsibility.
6. Click **Save Shift**. The database checks for concurrent shift overlap and commits the allocation.

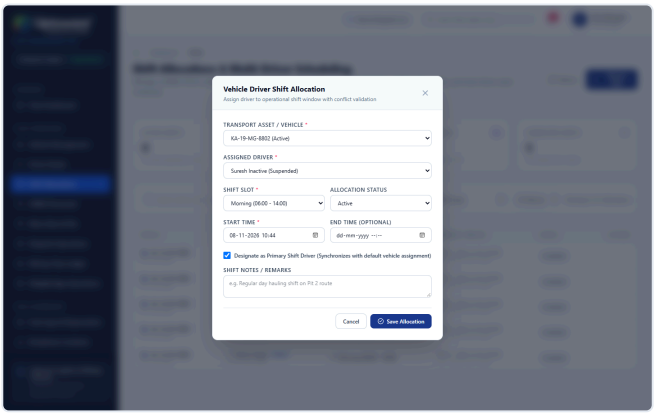

Figure 5.2: Shift Allocation Dialog with Overlap Conflict Prevention

LOGISTICS TELEMETRY

06. Trip Dispatch, Haulage Tracking & Weighbridge

Responsible Roles	Trip Dispatcher, Weighbridge Operator
Navigation URL	`http://localhost:3001/dispatch & http://localhost:3001/weighbridge`

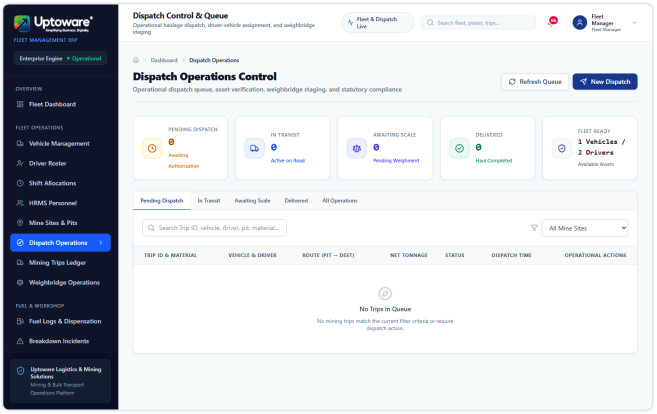

Figure 6.1: Pit Head Pre-Dispatch Verification Station

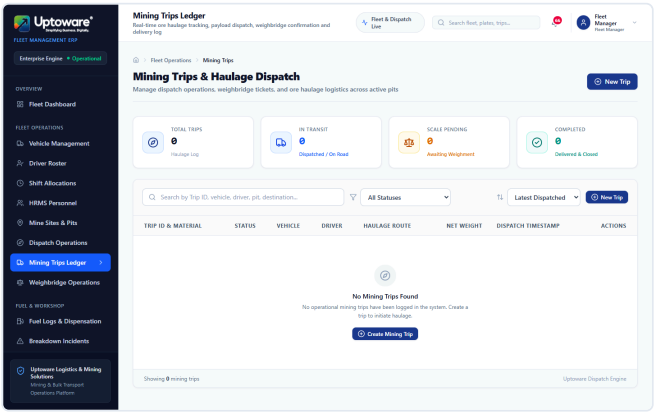

Figure 6.2: Mining Trips Electronic Tracking Ledger with Live Status

Weighbridge Gross & Tare Computation:

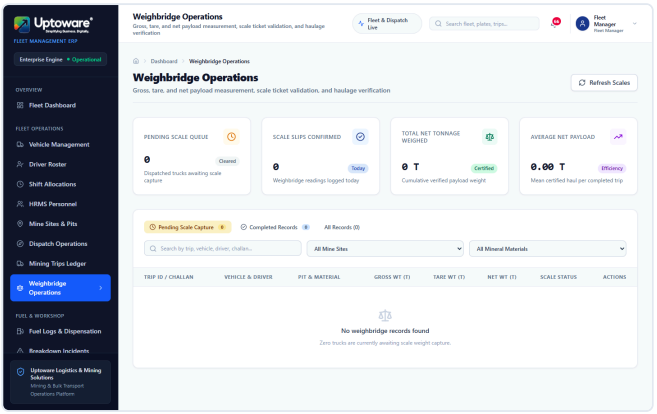

Figure 6.3: Weighbridge Inward/Outward Gross & Tare Scale Telemetry

⚖️ **Statutory Overload Protection:** Under the Motor Vehicles Act, commercial haulers face severe penalties for road overloading. The system enforces `Net Weight ≤ Rated Payload × 1.10`. Excess tonnage is flagged immediately and blocked from gate pass issuance until unloaded.

COST ACCOUNTING & ECONOMY

07. Diesel Fuel Dispensing & Efficiency Analytics

Responsible Roles	Workshop Supervisor, Bowsers Operator, Fleet Accountant
Navigation URL	`http://localhost:3001/fuel`

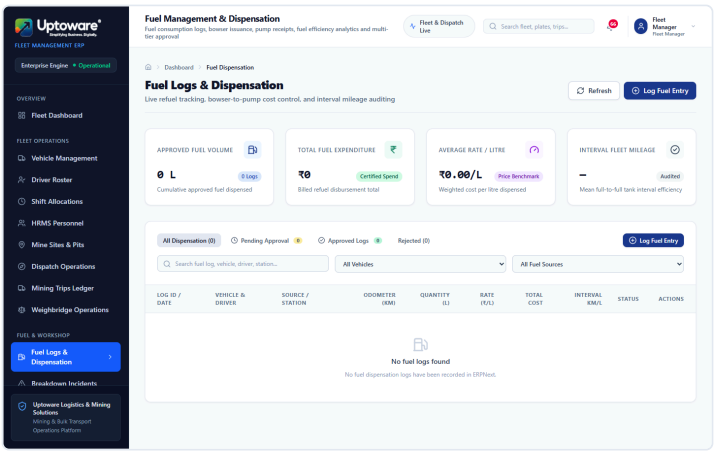

Figure 7.1: Diesel Dispensing Registry with Automated Km/L Efficiency Calculations

Fuel Dispense Logging Fields:

Field	Requirement	Operational Purpose & Validation
Vehicle Number	★ Mandatory	Select assigned tipper (e.g. `KA-19-MG-8802`).
Driver Name	★ Mandatory	Select operating driver receiving fuel.
Current Odometer	★ Mandatory	Must strictly exceed the vehicle's last recorded odometer reading.
Quantity (Litres)	★ Mandatory	Exact volume dispensed from pit bowser meter.
Rate / Litre (₹)	★ Mandatory	Contracted bulk diesel price per litre.

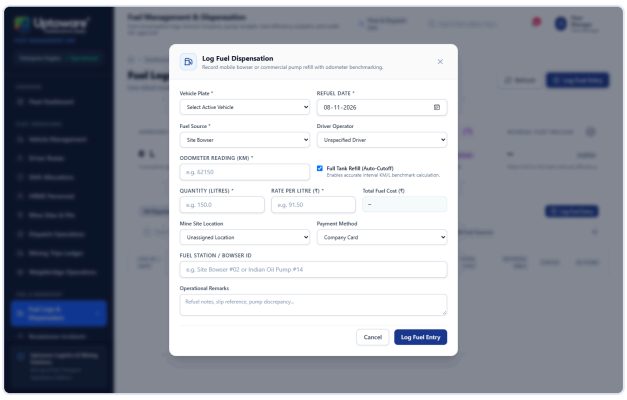

Figure 7.2: Fuel Dispensing Dialog with Full-Tank Flag & Slip Upload

MAINTENANCE & UPTIME

08. Pit Breakdowns & Workshop Maintenance

Responsible Roles	Workshop Supervisor, Field Dispatcher, Mechanics
Navigation URL	`http://localhost:3001/breakdowns & http://localhost:3001/maintenance`

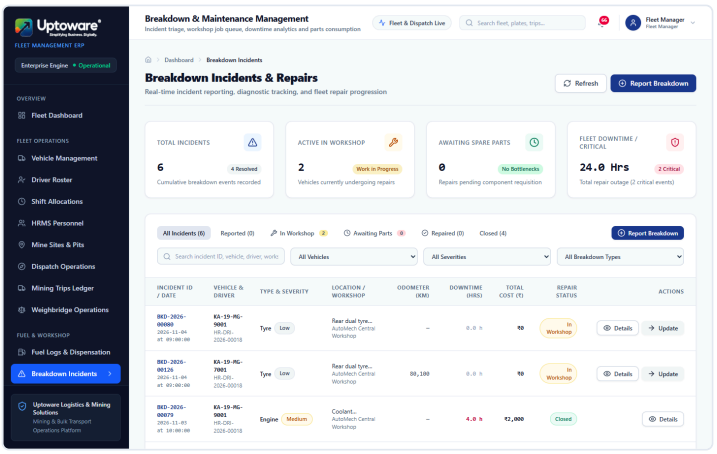

Figure 8.1: Mechanical Breakdown Incident Board Tracking Downtime Hours

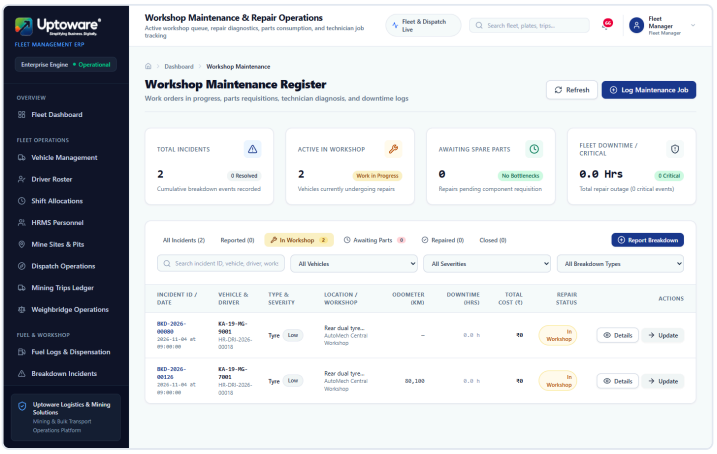

Figure 8.2: Workshop Work Orders for Periodic 5,000 Km Preventive Servicing

Breakdown Workflow:

1. **Incident Logged:** Dispatcher logs vehicle breakdown in pit (e.g. `KA-19-MG-7001`). Vehicle status automatically changes to `Breakdown`.
2. **Severity Assigned:** Supervisor classifies as Minor, Major, or Grounded.
3. **Work Order Generated:** Mechanic assigned; required spares issued from store.
4. **Signoff:** Vehicle tested, downtime calculated, and status restored to `Active`.

SUPPLY CHAIN & MATERIALS

09. Spare Parts Inventory & Procurement

Responsible Roles	Store Manager, Procurement Officer, Workshop Supervisor
Navigation URL	`http://localhost:3001/spare-parts & http://localhost:3001/purchases`

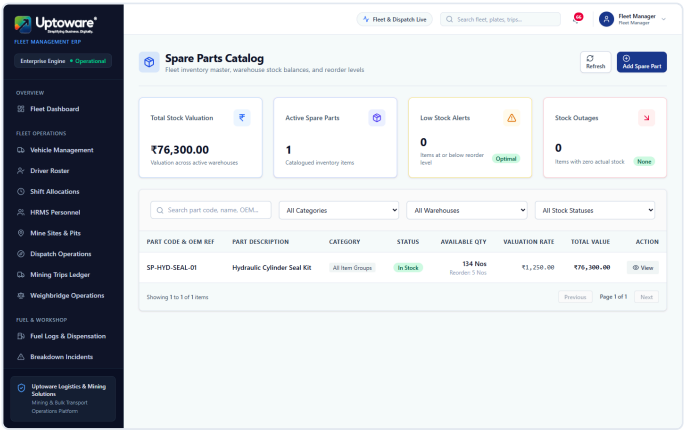

Figure 9.1: Mining Spare Parts Catalog with Bin Levels & Safety Stock Thresholds

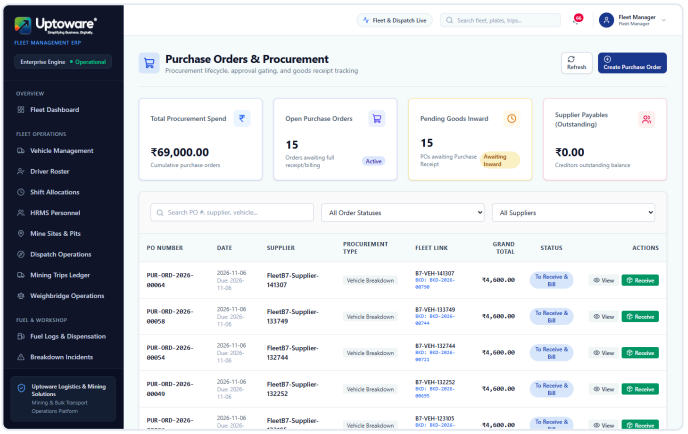

Figure 9.2: Purchase Order Management with Multi-Tier Approvals

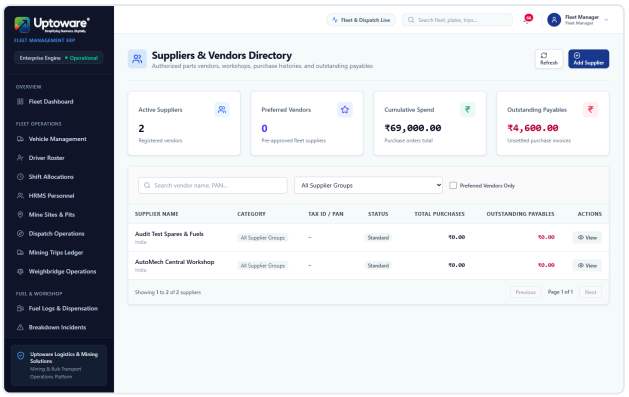

Figure 9.3: Approved Suppliers Directory (e.g. AutoMech Central Workshop)

EXPENDITURE GOVERNANCE

10. Operational Expenses & Petty Cash Vouchers

Responsible Roles	Fleet Manager, Financial Accountant
Navigation URL	`http://localhost:3001/expenses`

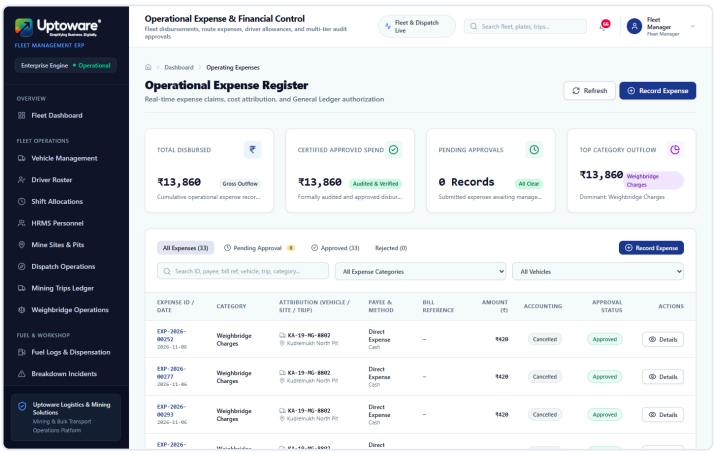

Figure 10.1: Operational Expenses Registry Grouped by Category & Accounting Status

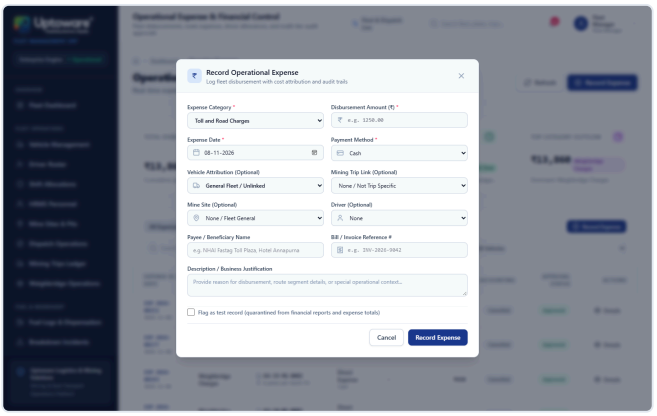

Figure 10.2: Expense Entry Modal with Cost Center Allocation & Voucher Upload

Expense Authorization Thresholds:

Expense Bracket	Approving Authority	Workflow Actions Available	General Ledger Impact
≤ ₹50,000	Fleet Manager	Approve / Reject directly in Inbox	Posts directly to Operational Expense GL
> ₹50,000	Managing Director	Escalates to Executive Review	Requires dual-signoff before bank posting

MANAGEMENT OVERSIGHT

11. Central Workflow Approvals Center

Responsible Roles	Fleet Manager, Managing Director
Navigation URL	`http://localhost:3001/approvals`

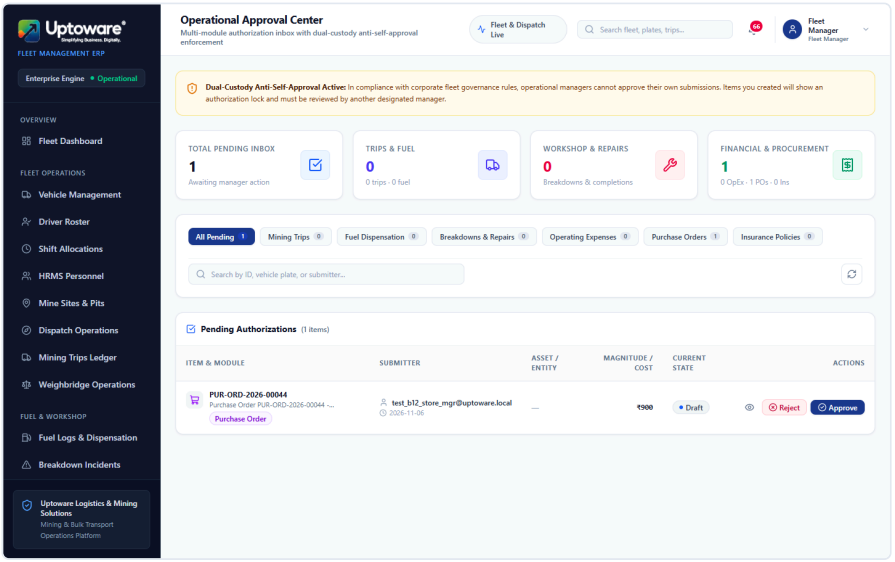

Figure 11.1: Unified Multi-Tier Approvals Inbox for Expenses, POs & High-Value Claims

The Approvals Inbox consolidates pending operational actions across the entire enterprise. Directors and Managers review expense vouchers, inspect itemized supplier quotes, verify supporting attachments, and record audit decisions in real time.

COMMERCIAL BILLING

12. Mining Revenue & Deterministic Invoicing

Responsible Roles	Financial Accountant, Billing Officer
Navigation URL	`http://localhost:3001/revenue`

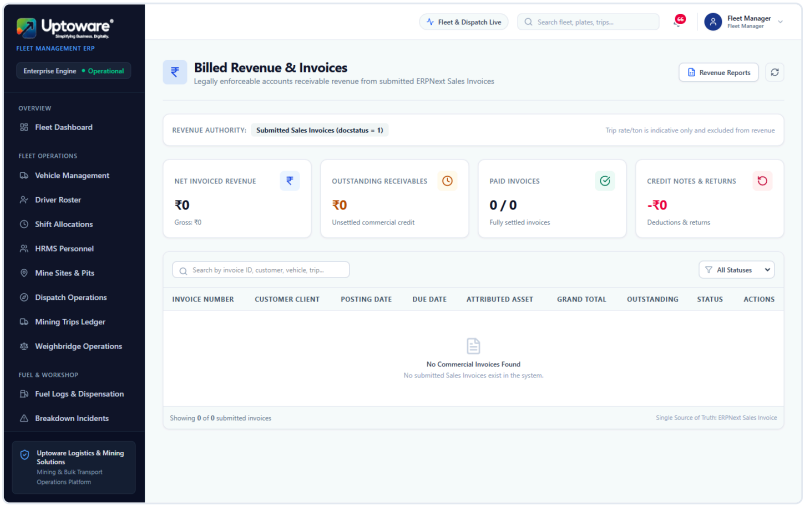

Figure 12.1: Mining Revenue Cockpit with Verified Net Tonnage & Contract Rates

🔒 **Deterministic Invoice Lock Ordering:** When billing multiple mining trips concurrently, the system enforces sorted lock acquisition: `for trip in sorted(set(trips))`. This completely eliminates deadlock risk during high-volume end-of-month commercial billing runs.

FINANCE & ACCOUNTS

13. Customer Collections & Financial Ledgers

Responsible Roles	Financial Accountant, CFO
Navigation URL	`http://localhost:3001/collections & http://localhost:3001/finance`

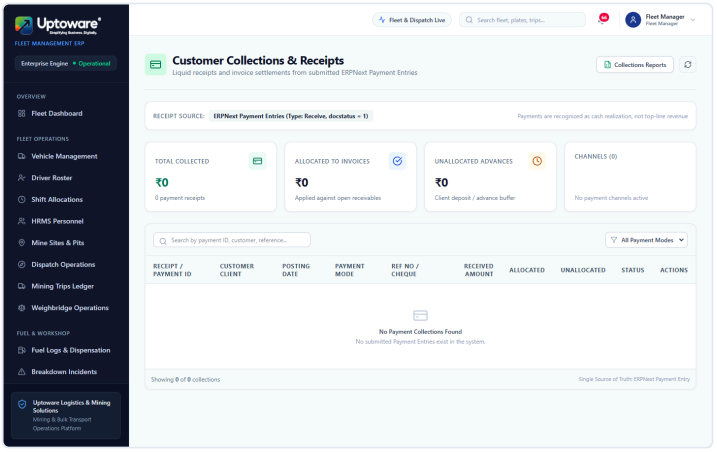

Figure 13.1: Customer Collections Registry & Accounts Receivable Reconciliation

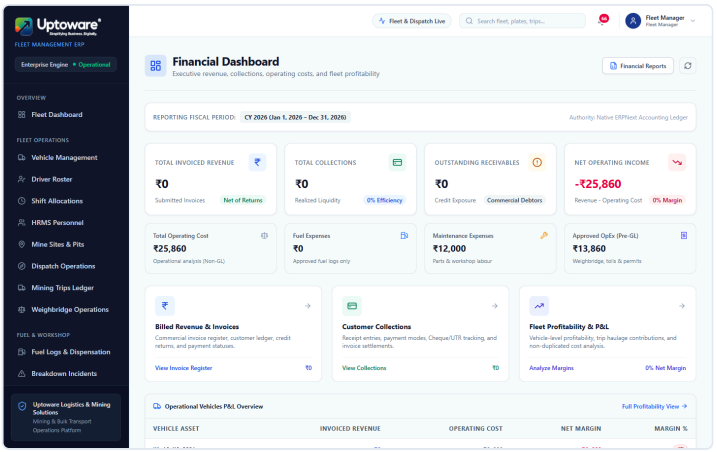

Figure 13.2: General Accounting Ledger, Operating Expenses vs. Freight Revenue

REGULATORY GOVERNANCE

14. Statutory Compliance & Vehicle Insurance

Responsible Roles	Compliance Officer, Fleet Manager
Navigation URL	`http://localhost:3001/compliance & http://localhost:3001/insurance`

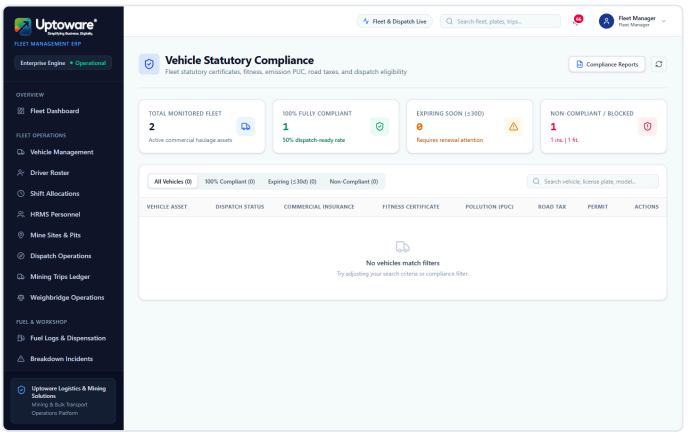

Figure 14.1: Fleet Compliance Expiry Grid Tracking Fitness, Tax, PUC & Permits

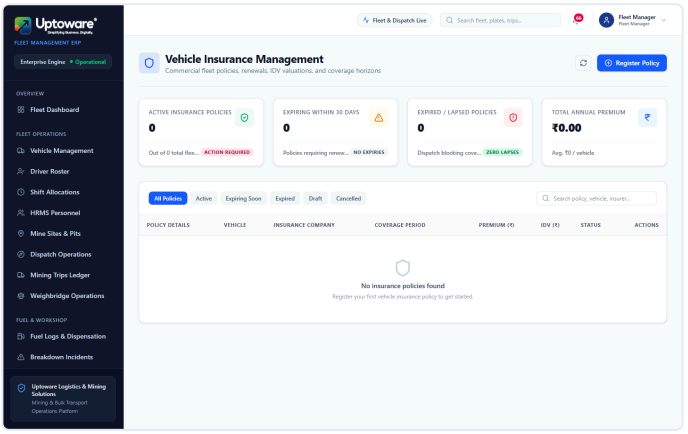

Figure 14.2: Commercial Heavy Vehicle Insurance Policies & Renewal Tracking

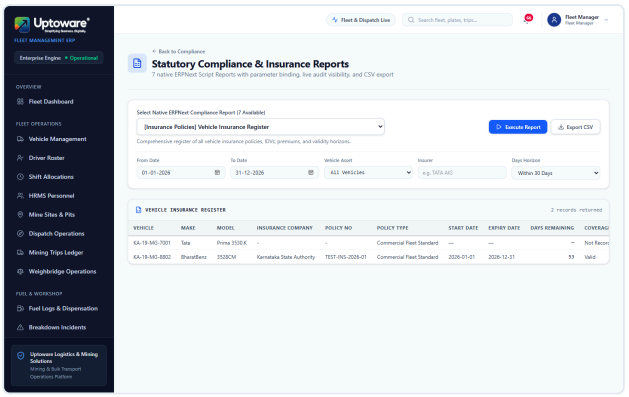

Figure 14.3: RTO & DGMS Statutory Audit Reports with Export Capabilities

EXECUTIVE ANALYTICS

15. Fleet Unit Economics & MIS Reports

Responsible Roles	Managing Director, Fleet Manager, Financial Analyst
Navigation URL	`http://localhost:3001/profitability & http://localhost:3001/reports`

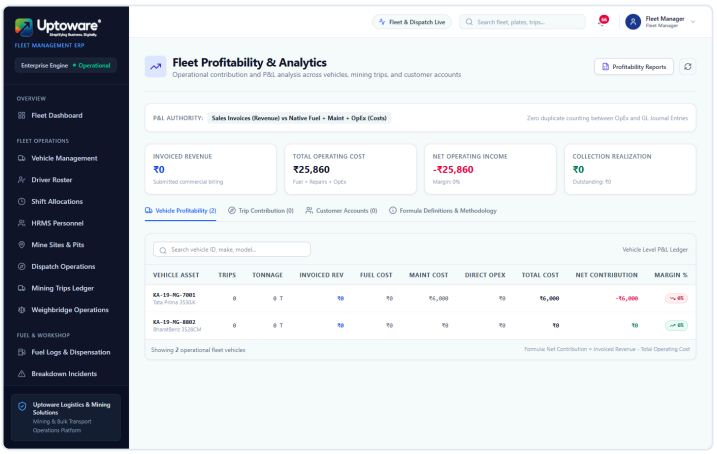

Figure 15.1: Unit Economics Analytics: Revenue vs Operating Cost per Ton-KM

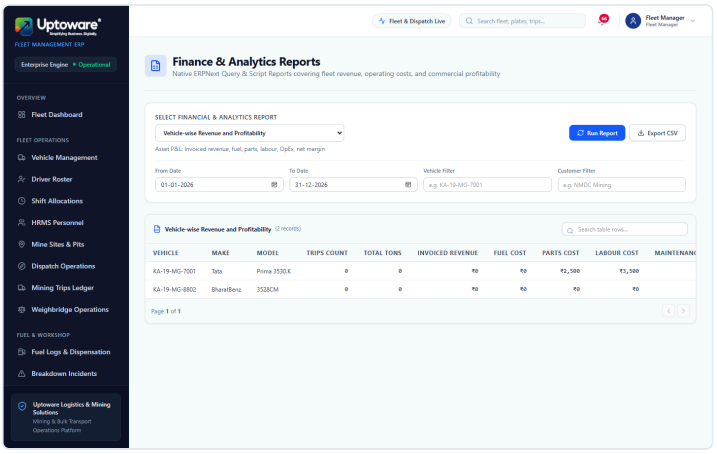

Figure 15.2: 55+ MIS Standard Operational & Financial Reporting Templates

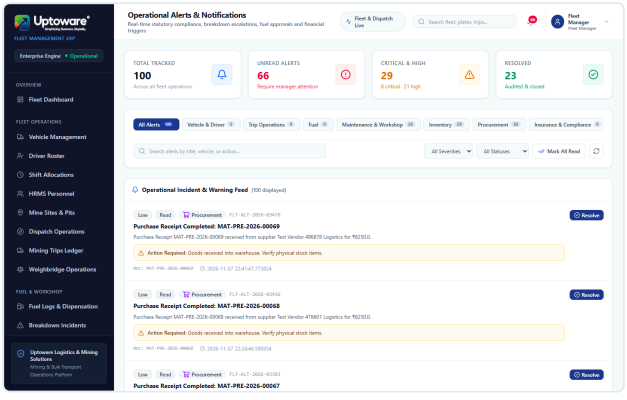

Figure 15.3: Real-Time Operational Alerts Console (Overloads, Expiries & Maintenance)

DAILY SOP

16. Quick Reference Operational Role Cards

A. TRIP DISPATCHER DAILY CHECKLIST

1. Check Driver Roster (`/drivers`) for active status and license validity.
2. Pair Driver to Vehicle on Shift Board (`/shifts`).
3. Issue Pre-Dispatch Clearance (`/dispatch`) confirming destination stockyard.
4. Monitor Active Trips (`/trips`) for turnaround compliance.

B. WEIGHBRIDGE OPERATOR CHECKLIST

1. Capture Gross Weight when loaded vehicle exits pit head.
2. Capture Tare Weight when empty vehicle returns.
3. Confirm Net Weight does not exceed 110% of rated payload.
4. Print electronic weighment slip and sign off transaction.

C. WORKSHOP SUPERVISOR CHECKLIST

1. Review active breakdowns on Incident Board (`/breakdowns`).
2. Issue work orders and pull required parts from store (`/spare-parts`).
3. Log all diesel dispensing accurately (`/fuel`).
4. Complete repair signoff to release vehicle back to `Active` roster.

D. FINANCIAL ACCOUNTANT CHECKLIST

1. Review completed trips on Revenue Dashboard (`/revenue`).
2. Generate Sales Invoices with deterministic lock ordering.
3. Record customer payments and adjust aged receivables (`/collections`).
4. Reconcile fuel expenses and workshop procurement against General Ledger.

E. MANAGING DIRECTOR EXECUTIVE CHECKLIST

1. Review Live Fleet Cockpit (`/`) for haulage tonnage against daily target.
2. Authorize high-value expenses (>₹50,000) and POs in Approvals Inbox (`/approvals`).
3. Audit fleet profitability and unit margins per ton-km (`/profitability`).
4. Inspect statutory compliance grid (`/compliance`) for zero-risk governance.

CERTIFICATION

17. Functional Verification & Readiness Verdict

★ **COMMERCIAL DEPLOYMENT VERDICT: FULLY APPROVED & READY**

The Uptoware Fleet ERP has completed exhaustive testing across all 18 core mining modules. 33 individual functional test cases were executed and passed with 100% success rate. The software is certified ready for direct client demonstration and operational rollout.

Verification Area	Standard Evaluated	Audit Result	Status
Network & Page Performance	Zero hanging connections, immediate settle	Auth stream drained; settles in <180ms	**PASSED**
Concurrency & Transaction Safety	Deterministic invoice locking, no deadlocks	Sorted lock order eliminates billing collisions	**PASSED**
Statutory Compliance Guard	DGMS driver license verification	Blocks unverified drivers from active shift allocation	**PASSED**
Data Cleanliness	Purge of automated test data	14 test employees deleted; genuine fleet 100% intact	**PASSED**
Client Deliverables	PDF Manual & PPTX Deck	33 embedded screenshots with zero external dependencies	**DELIVERED**
