OPERATOR & PRESENTER SETUP MANUAL

UPTOWARE FLEET ERP HANDS-ON DATA ENTRY GUIDE

Step-by-Step Field-by-Field Manual Data Entry Instructions for Setting Up a Complete Fictional Mining Company from Scratch

100% UI EXECUTION | KALINGA MINING OPERATIONS | ZERO DATABASE SCRIPTING

DEMONSTRATION COMPANY
Kalinga Mining Operations (Internal: Uptoware)

PRIMARY EXTRACTION SITE
Kalinga Mining Site (Iron Ore Crushing Circuit)

PRIMARY TIPPER ASSET
OD-02-AB-4589 (BharatBenz 3528CM Heavy Tipper)

ASSIGNED COMMERCIAL DRIVER
Amit Kumar (Commercial Licence: DL-072021004589)

1. Master Data Entry Pre-Flight Checklist

Follow this table sequentially. Each record provides the prerequisite link for the following operational stage. Check off each box as you complete the record in the browser UI:

Seq #	Record to Create	Navigation Page	Required Prerequisite	Sample Identifier / Name	Done	Next Action
1	**Mine Site**	`/mine-sites`	None (Base Master)	`Kalinga Mining Site`	[ ]	Create Vehicle
2	**Vehicle Master**	`/vehicles`	None (Independent)	`OD-02-AB-4589`	[ ]	Create Driver
3	**Driver Profile**	`/drivers`	Vehicle OD-02-AB-4589	`Amit Kumar`	[ ]	Shift Allocation
4	**Shift Allocation**	`/shifts`	Vehicle + Driver	`Morning (06:00 - 14:00)`	[ ]	Trip Dispatch
5	**Trip Dispatch**	`/dispatch`	Active Shift Allocation	`TRIP-... (Dispatched)`	[ ]	Weighbridge Scale
6	**Weighbridge Scale Ticket**	`/weighbridge`	Dispatched Trip	`Gross: 50.40 MT | Net: 32.40 MT`	[ ]	Trip Delivery
7	**Trip Delivery Closeout**	`/dispatch` or `/trips`	Weighbridge Confirmed Trip	`Closing Odo: 104,240 km`	[ ]	Fuel Logging
8	**Fuel Dispensation Log**	`/fuel`	Vehicle OD-02-AB-4589	`120.0 L @ ₹92.50 = ₹11,100`	[ ]	Breakdown Incident
9	**Breakdown Incident**	`/breakdowns`	Vehicle OD-02-AB-4589	`Hydraulic Pump Rupture`	[ ]	Workshop Repair
10	**Workshop Repair Closeout**	`/breakdowns`	Active Breakdown	`Repaired (Labour: ₹1,200)`	[ ]	Purchase Order
11	**Purchase Order (PO)**	`/purchases`	Supplier + Breakdown	`Odisha Auto Parts (PO-...)`	[ ]	Operational Expense
12	**Operational Expense**	`/expenses`	Vehicle OD-02-AB-4589	`Highway Toll: ₹1,450.00`	[ ]	Executive Approval
13	**Executive Approval**	`/approvals`	Submitted Expense	`Approved (MD Stamp)`	[ ]	Revenue Audit
14	**Revenue & Billing Audit**	`/revenue`	Completed Weighbridge Trip	`32.40 MT @ ₹450 = ₹14,580`	[ ]	Collections Ledger
15	**Collections Reconciliation**	`/collections`	Billed Invoice	`Settlement: ₹14,580.00`	[ ]	Compliance Watch
16	**Compliance & Expiries**	`/compliance`	Vehicle Statutory Expiries	`Fitness / PUC Watchlist`	[ ]	Reports & Alerts
17	**Reports & Alerts Console**	`/reports` & `/alerts`	System Operational Events	`Tonnage vs Daily Target`	[ ]	Fleet Profitability
18	**Single-Truck Profitability P&L**	`/profitability`	Revenue less Costs	`Net Operating Profit: ₹830`	[ ]	**COMPLETE**

2. Step-by-Step Hands-On Data Entry Instructions

STEP 1: Create Mine Site

SEQUENCE #1

> Navigation: Sidebar → Click **Mine Sites** (URL: `http://localhost:3001/mine-sites`)

Click Sequence:

1. Click **Mine Sites** on the left navigation bar.
2. Click the blue **Add Mine Site** button located at the top-right corner.
3. The *Add Mine Site* modal will pop up. Enter the exact values below.
4. Click the blue **Create Mine Site** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Mine Site Name	Text * **Required**	`Kalinga Mining Site`	Primary site identifier across trips and dispatch
Client / Customer	Dropdown (Optional)	Leave Blank or select `NMDC Mining Corp (TEST)`	Contractual client for hauling revenue
Mineral Extracted	Dropdown * **Required**	Select `Iron Ore`	Options: Iron Ore, Coal, Bauxite, Limestone
Operating Status	Dropdown * **Required**	Select `Operational`	Must be Operational to allow trip dispatch
Active Loading Pits	Number * **Required**	`2`	Number of active excavation benches
Daily Target Capacity (MT/day)	Number (Optional)	`1500`	Daily production target for operational reports
Indicative Rate / Ton (₹)	Currency (Optional)	`450.00`	Contract freight tariff used for trip billing
Site Address & Access Notes	Textarea (Optional)	`Bench 4 South Sector, Barbil Mining Belt`	Physical access notes for drivers

Expected Result: Modal closes cleanly. A green toast notification appears stating "*Mine Site created successfully*". `Kalinga Mining Site` appears as the first row in the Mine Sites table with an **Operational** green badge.

Next Required Step: Register the primary demonstration tipper truck. Go to Step 2 →

STEP 2: Register Heavy Vehicle Master

SEQUENCE #2

> Navigation: Sidebar → Click **Vehicles** (URL: `http://localhost:3001/vehicles`)

Click Sequence:

1. Click **Vehicles** on the left navigation bar.
2. Click the blue **Add Vehicle** button located at the top-right corner.
3. The *Add New Vehicle Asset* modal will pop up. Enter the exact values below.
4. Click the blue **Register Vehicle Asset** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Registration Number / Plate	Text * **Required**	`OD-02-AB-4589`	Fictional commercial plate formatted uppercase
Operational Status	Dropdown * **Required**	Select `Active`	Must be Active to allow shift allocation and trip dispatch
Manufacturer / Make	Text * **Required**	`BharatBenz`	OEM manufacturer
Vehicle Model	Text * **Required**	`3528CM Heavy Tipper`	Heavy 8x4 mining tipper chassis
Assigned Driver	Dropdown (Optional)	Leave `Select assigned driver...`	Driver will be assigned cleanly in Step 3/4
Fuel Type	Dropdown (Optional)	Select `Diesel`	Standard for heavy commercial tippers
Payload Capacity (Metric Tons)	Number (Optional)	`35.00`	Critical for weighbridge overload safety checks
Current Odometer Reading (KM)	Number (Optional)	`104200`	Starting baseline for fuel and trip distance calculations
Commercial Insurance Expiry	Date (Optional)	`2027-10-15` (Future Date)	Green compliance status indicator
Fitness Certificate Expiry	Date (Optional)	`2027-08-20` (Future Date)	Ensures vehicle passes dispatch compliance gate
Pollution Under Control (PUC)	Date (Optional)	`2027-04-10` (Future Date)	Valid statutory emission check
Road Tax Expiry	Date (Optional)	`2027-12-31` (Future Date)	Valid commercial road tax token
Mining & Goods Permit Expiry	Date (Optional)	`2027-09-30` (Future Date)	Mandatory mining lease transit pass

Expected Result: Modal closes. `OD-02-AB-4589` appears in the Vehicles table with status **Active**, capacity **35.0 MT**, and green **Compliant** badges for all statutory dates.

Next Required Step: Register the commercial driver who will operate this truck. Go to Step 3 →

STEP 3: Register Qualified Driver

SEQUENCE #3

> Navigation: Sidebar → Click **Drivers** (URL: `http://localhost:3001/drivers`)

Click Sequence:

1. Click **Drivers** on the left navigation bar.
2. Click the blue **Add Driver** button at the top-right corner.
3. The *Add New Driver Profile* modal will pop up. Enter the exact values below.
4. Click the blue **Create Driver Profile** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Full Name	Text * **Required**	`Amit Kumar`	Fictional operator name
Driver Status	Dropdown * **Required**	Select `Active`	Options: Active, Suspended, Left. Must be Active to roster.
Cell / Phone Number	Text (Optional)	`+91 98765 43210`	Fictional 10-digit mobile number
Commercial Driving Licence #	Text * **Required**	`DL-072021004589`	**Mandatory:** Active drivers require non-empty licence
Licence Issuing Date	Date (Optional)	`2021-05-10`	Issuing date of heavy transport endorsement
Licence Expiry Date	Date (Optional)	`2029-05-09` (Future Date)	Must be in future to pass compliance gate
Medical Fitness Expiry Date	Date (Optional)	`2027-06-30` (Future Date)	Annual DGMS medical certificate
Safety Performance Score	Number (Optional)	`98`	Score out of 100 (Default: 100)
Emergency Contact Name	Text (Optional)	`Ramesh Kumar (Brother)`	Emergency contact person
Emergency Contact Phone	Text (Optional)	`+91 98765 00000`	Emergency contact number

Expected Result: Modal closes cleanly. `Amit Kumar` appears in the Drivers roster with system ID (e.g. `HR-DRI-2026-00067`), status **Active**, licence **DL-072021004589**, and safety score **98%**.

Next Required Step: Allocate Amit Kumar and truck OD-02-AB-4589 to the daily shift. Go to Step 4 →

STEP 4: Shift Allocation & Daily Rostering

SEQUENCE #4

> Navigation: Sidebar → Click **Shift Allocation** (URL: `http://localhost:3001/shifts`)

Click Sequence:

1. Click **Shift Allocation** on the left navigation bar.
2. Click the blue **New Allocation** button located at the top-right corner.
3. The *Allocate Vehicle & Driver to Shift* modal will pop up. Enter the exact values below.
4. Click the blue **Confirm Allocation** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Transport Asset / Vehicle	Dropdown * **Required**	Select `OD-02-AB-4589`	Select the vehicle created in Step 2
Assigned Driver	Dropdown * **Required**	Select `Amit Kumar`	Select the driver created in Step 3
Shift Slot	Dropdown * **Required**	Select `Morning (06:00 - 14:00)`	Options: Morning, Afternoon, Evening, Night, General
Allocation Status	Dropdown (Optional)	Select `Active`	Status changes to Active to allow dispatch
Start Time	Datetime * **Required**	Enter Today's Date at `06:00` (e.g. `2026-11-09T06:00`)	Shift start boundary
End Time	Datetime (Optional)	Enter Today's Date at `14:00` (e.g. `2026-11-09T14:00`)	Shift end boundary (8 hours)
Shift Notes / Remarks	Textarea (Optional)	`Iron Ore haulage circuit - Kalinga Mining Site`	Operational note for shift supervisor

Expected Result: Modal closes. The shift allocation row appears on the Shift Board displaying `OD-02-AB-4589` paired with `Amit Kumar` under the **Morning Shift** tab with status **Active**.

Next Required Step: Dispatch the vehicle for its mineral hauling trip. Go to Step 5 →

STEP 5: Create & Dispatch Mineral Haulage Trip

SEQUENCE #5

> Navigation: Sidebar → Click **Dispatch** (URL: `http://localhost:3001/dispatch`)

Click Sequence:

1. Click **Dispatch** on the left navigation bar.
2. Click the blue **Create Dispatch** button at the top-right corner.
3. The *Create Trip Dispatch* modal will pop up. Enter the exact values below.
4. Click the blue **Dispatch Vehicle** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Vehicle	Dropdown * **Required**	Select `OD-02-AB-4589`	Pulls from Active compliant vehicles
Driver	Dropdown * **Required**	Select `Amit Kumar`	Pulls from active drivers assigned to this shift
Loading Mine Site	Dropdown * **Required**	Select `Kalinga Mining Site`	Origin extraction pit created in Step 1
Destination	Text * **Required**	`Railway Siding #1 (Barbil Yard)`	Mineral delivery stockyard terminal
Material	Dropdown * **Required**	Select `Iron Ore`	Options: Iron Ore, Coal, Bauxite, Limestone
Opening Odometer (km)	Number (Optional)	`104200`	Matches current vehicle odometer
Challan Number	Text (Optional)	`CH-OD02-2026-001`	Paper transit pass reference number

Expected Result: Modal closes. A new trip token is generated (e.g. `TRIP-2026-00413`). The trip appears in the Active Dispatch Queue with status **Dispatched**, vehicle **OD-02-AB-4589**, and route Kalinga Mining Site → Railway Siding #1.

Next Required Step: Truck arrives at scale. Capture Gross and Tare weight. Go to Step 6 →

STEP 6: Capture Weighbridge Scale Ticket & Net Payload

SEQUENCE #6

> Navigation: Sidebar → Click **Weighbridge** (URL: `http://localhost:3001/weighbridge`)

Click Sequence:

1. Click **Weighbridge** on the left navigation bar.
2. Under the **Pending Scale Queue** tab, locate the trip for truck `OD-02-AB-4589`.
3. Click the blue **Scale Icon** button (or *Capture Scale* button) on that row.
4. The *Weighbridge Scale Interface* modal will pop up. Enter the exact values below.
5. Click the green **Confirm Weighment Ticket** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Gross Weight (Loaded) [MT]	Number * **Required**	`50.40`	Loaded truck scale reading (50,400 kg)
Tare Weight (Empty) [MT]	Number * **Required**	`18.00`	Empty truck scale reading (18,000 kg)
Calculated Net Payload [MT]	Auto-Calculated *(Read-Only)*	`32.40 MT`	System automatically calculates: 50.40 - 18.00
Challan / Scale Ticket #	Text (Optional)	`WB-KLG-2026-001`	Digital scale terminal ticket sequence number
Overload Status Check	System Badge *(Read-Only)*	`Safe (Green)`	Validates 32.40 MT is within 35.00 MT rating

> **Expected Result:** Modal closes. The trip moves from the *Pending Scale Queue* to the *Completed Scale Records* table. Status updates to **Weighbridge Confirmed** with Net Weight recorded as **32.40 MT**.

Next Required Step: Complete the trip delivery and close out return odometer. Go to Step 7 →

STEP 7: Complete Trip Delivery & Close Out Odometer

SEQUENCE #7

> Navigation: Sidebar → Click **Dispatch** or **Trips** (URL: `http://localhost:3001/trips`)

Click Sequence:

1. Click **Trips** (or stay on **Dispatch**) and locate the trip for `OD-02-AB-4589`.
2. Click the row to open the **Trip Details Drawer**.
3. Click the blue **Mark Delivered / Close Trip** button.
4. The *Trip Delivery Closeout* modal will pop up. Enter the values below.
5. Click **Confirm Delivery** to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Closing Odometer Reading (km)	Number * **Required**	`104240`	Opening was 104,200 km → 40 km haul distance
Return Date & Time	Datetime (Optional)	Today's Date at `11:30` (e.g. `2026-11-09T11:30`)	Trip completion timestamp
Delivery Confirmation Remarks	Textarea (Optional)	`Dumped successfully at Railway Siding Hopper #2`	Stockpile handover notes

> **Expected Result:** Trip status transitions to **Delivered**. Vehicle odometer is automatically updated to 104,240 km. The trip becomes eligible for customer invoicing under the Revenue module.

Next Required Step: Log fuel dispensed into the vehicle after completing the haul. Go to Step 8 →

STEP 8: Log Fuel Dispensation & Efficiency

SEQUENCE #8

> Navigation: Sidebar → Click **Fuel Management** (URL: `http://localhost:3001/fuel`)

Click Sequence:

1. Click **Fuel** on the left navigation bar.
2. Click the blue **Add Fuel Entry** button located at the top-right corner.
3. The *Add Fuel Log Entry* modal will pop up. Enter the exact values below.
4. Click the blue **Record Fuel Entry** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Vehicle Plate	Dropdown * **Required**	Select `OD-02-AB-4589`	Our demonstration tipper asset
Fuel Source	Dropdown * **Required**	Select `Internal Bowser`	Options: Internal Bowser, Pit Bunk, External Commercial Pump
Driver Operator	Dropdown (Optional)	Select `Amit Kumar`	Driver who fueled the vehicle
Fuel Quantity (Litres)	Number * **Required**	`120.00`	Volume of high-speed diesel dispensed
Fuel Unit Price (₹/L)	Currency * **Required**	`92.50`	Price per litre
Total Fuel Cost (₹)	Auto-Calculated *(Read-Only)*	`₹11,100.00`	System computes: 120.00 L x ₹92.50
Current Odometer Reading (km)	Number (Optional)	`104240`	Matches current odometer reading
Mine Site Location	Dropdown (Optional)	Select `Kalinga Mining Site`	Location of internal diesel bowser
Payment Method	Dropdown (Optional)	Select `Company Credit / Account`	Internal inventory transfer
Operational Remarks	Textarea (Optional)	`Routine post-haul bunkering from Pit Bowser #1`	Fuel log remark

> **Expected Result:** Modal closes. The fuel log record is saved (e.g. `FL-2026-00193`). Total fuel cost of **₹11,100.00** is debited to vehicle `OD-02-AB-4589`'s operational cost center.

Next Required Step: Report a field breakdown incident on the tipper. Go to Step 9 →

STEP 9: Report Field Breakdown Incident

SEQUENCE #9

> Navigation: Sidebar → Click **Breakdowns** (URL: `http://localhost:3001/breakdowns`)

Click Sequence:

1. Click **Breakdowns** on the left navigation bar.
2. Click the red **Report Breakdown** button at the top-right corner.
3. The *Report Vehicle Breakdown Incident* modal will pop up. Enter the values below.
4. Click the red **Submit Breakdown Report** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Vehicle	Dropdown * **Required**	Select `OD-02-AB-4589`	Target vehicle reporting the stoppage
Breakdown Type	Dropdown * **Required**	Select `Hydraulic`	Options: Hydraulic, Engine, Tyre, Electrical, Brake
Severity	Dropdown * **Required**	Select `Medium`	Options: Low, Medium, Critical
Breakdown Location	Text * **Required**	`Pit Ramp 2, Kudremukh Sector`	Specific bench location in the mine
Date & Time	Date & Time * **Required**	Today's Date at `12:15`	Incident occurrence timestamp
Driver	Dropdown (Optional)	Select `Amit Kumar`	Operator on duty during failure
Mine Site	Dropdown (Optional)	Select `Kalinga Mining Site`	Mine site where incident occurred
Assigned Workshop	Dropdown (Optional)	Select `AutoMech Central Workshop`	Vendor or workshop handling repair
Description / Failure Symptoms	Textarea * **Required**	`High pressure hydraulic hose coupling rupture near tipper lift cylinder`	Technical diagnosis note

> **Expected Result:** Breakdown record is created (e.g. `BKD-2026-00085`) with status **Reported**. The vehicle's status on the dashboard updates to **Breakdown**, locking it from further trip dispatch.

Next Required Step: Process workshop job card and complete repair. Go to Step 10 →

STEP 10: Workshop Job Card & Repair Closeout

SEQUENCE #10

> Navigation: Sidebar → Click **Breakdowns** or **Maintenance** (URL: `http://localhost:3001/breakdowns`)

Click Sequence:

1. Locate breakdown record `BKD-2026-00085` for truck `OD-02-AB-4589`.
2. Click the blue **Workflow Action** button (or *Send to Workshop*).
3. Select action **Send to Workshop** → Status changes to *In Workshop*.
4. Click **Workflow Action** again and select **Mark Repaired**.
5. Enter repair details and labor cost, then click **Confirm Repair**.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Selected Workflow Action	Dropdown * **Required**	Select `Mark Repaired`	Transitions vehicle from In Workshop to Repaired
Repair Details & Replaced Parts	Textarea * **Required**	`Replaced 1x High-Pressure Hydraulic Hose assembly and refilled 15L Tellus 68 oil`	Work order repair summary
Mechanic Labour Cost (₹)	Currency (Optional)	`1200.00`	Fitter and welder labour charges

> **Expected Result:** Breakdown status transitions to **Repaired**. Vehicle status returns to **Active**. The ₹1,200 labour charge is posted to the vehicle's maintenance cost ledger.

Next Required Step: Create a Purchase Order to replenish workshop spare parts. Go to Step 11 →

STEP 11: Create Purchase Order for Spare Parts

SEQUENCE #11

Navigation: Sidebar → Click **Purchases** (URL: `http://localhost:3001/purchases`)

Click Sequence:

1. Click **Purchases** on the left navigation bar.
2. Click the blue **Create Purchase Order** button at the top-right corner.
3. The *Create Purchase Order* modal will pop up. Enter the exact values below.
4. Click the blue **Submit Purchase Order** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Supplier / Vendor	Dropdown * **Required**	Select `AutoMech Central Workshop`	Authorized workshop parts supplier
Order Date	Date * **Required**	Today's Date (e.g. `2026-11-09`)	Purchase commitment date
Expected Delivery Date	Date * **Required**	Tomorrow's Date (e.g. `2026-11-10`)	Agreed delivery milestone
Procurement Purpose	Dropdown (Optional)	Select `Spare Parts Replenishment`	Options: Spare Parts Replenishment, Emergency Repair
Receiving Warehouse	Dropdown (Optional)	Select `Stores - U` (or `Kudremukh Spares - U`)	Target inventory destination
Line Item Quantity & Rate	Table Inputs * **Required**	Quantity: `4` | Unit Rate: `₹1,500.00`	Total line cost: ₹6,000.00

Expected Result: Modal closes. Purchase Order (e.g. `PO-2026-00046`) is created with status **Draft / Submitted** for total amount of **₹6,000.00**.

Next Required Step: Enter driver highway toll expense for vehicle OD-02-AB-4589. Go to Step 12 →

STEP 12: Log Operational Highway Toll Expense

SEQUENCE #12

> Navigation: Sidebar → Click **Expenses** (URL: `http://localhost:3001/expenses`)

Click Sequence:

1. Click **Expenses** on the left navigation bar.
2. Click the blue **Add Expense** button located at the top-right corner.
3. The *Add Operational Expense* modal will pop up. Enter the values below.
4. Click the blue **Submit Expense for Approval** button to save.

Form Field Label	Type / Status	Exact Value to Enter / Select	Notes & Dependencies
Expense Category	Dropdown * **Required**	Select `Toll and Road Charges`	Options: Toll and Road Charges, Weighbridge Charges, Bhatta
Disbursement Amount (₹)	Currency * **Required**	`1450.00`	**Notice:** > ₹1,000 mandates Managing Director approval
Expense Date	Date * **Required**	Today's Date (e.g. `2026-11-09`)	Expense voucher transaction date
Payment Method	Dropdown * **Required**	Select `Cash` (or `Bank Draft / Fastag`)	Disbursement channel
Vehicle Attribution	Dropdown (Optional)	Select `OD-02-AB-4589`	Directly links the cash expense to the truck's P&L
Driver	Dropdown (Optional)	Select `Amit Kumar`	Operator submitting the voucher
Mine Site	Dropdown (Optional)	Select `Kalinga Mining Site`	Operational pit context
Payee / Beneficiary Name	Text (Optional)	`National Highway Toll Plaza Barbil`	Beneficiary vendor
Bill / Invoice Reference #	Text (Optional)	`FASTAG-REC-OD02-4589`	Receipt voucher identifier
Description / Business Justification	Textarea (Optional)	`Highway toll and municipal mineral transit fees for Iron Ore haulage`	Audit description

Expected Result: Modal closes. Expense (e.g. `EXP-2026-00566`) is created with status **Pending Approval / Submitted**. Because the amount is ₹1,450 (> ₹1,000 threshold), it routes directly to the Managing Director's inbox.

Next Required Step: Authorize the expense in the Executive Approvals Inbox. Go to Step 13 →

STEP 13: Executive Review & Dual-Control Approval

SEQUENCE #13

> Navigation: Sidebar → Click **Approvals** (URL: `http://localhost:3001/approvals`)

Click Sequence:

1. Click **Approvals** on the left navigation bar.
2. Click the **Operating Expenses** filter tab.
3. Locate pending expense `EXP-2026-00566` for truck `OD-02-AB-4589` (₹1,450.00).
4. Click the row to open the **Approval Review Drawer**.
5. Click the green **Approve Expense** button.

Review Attribute	Type / Status	Value Displayed on Screen	System Governance Check
Expense Identifier	Identifier	`EXP-2026-00566`	Unique immutable voucher ID
Attributed Vehicle	Asset Link	`OD-02-AB-4589`	Verified against vehicle registry
Claimed Amount	Currency	`₹1,450.00`	Mandates Managing Director approval role
Action Triggered	User Action	Click **Approve**	System stamps: `approved_by = fleet.manager`

> **Expected Result:** Expense status updates to **Approved** with green badge. The item is removed from the pending queue. The ₹1,450 amount is posted into accounts payable.

Next Required Step: Verify automated revenue generation from the completed trip. Go to Step 14 →

STEP 14: Verify Automated Freight Revenue & Invoicing

SEQUENCE #14

Navigation: Sidebar → Click **Revenue** (URL: `http://localhost:3001/revenue`)

Action Sequence:

1. Click **Revenue** on the left navigation bar.
2. Observe the monthly KPI cards: Total Invoiced Revenue increases by **₹14,580.00**.
3. Inspect the **Sales Invoice Register** table to locate invoice matching trip `OD-02-AB-4589`.

Billing Metric	Computation	Value	Audit Link
Net Delivered Payload	Weighbridge Slip	`32.40 Metric Tons`	Captured in Step 6 (Gross: 50.40 - Tare: 18.00)
Contractual Hauling Tariff	Mine Site Agreement	`₹450.00 / MT`	Tariff set under Kalinga Mining Site in Step 1
Automated Trip Revenue	Formula: 32.40 MT x ₹450	`₹14,580.00`	Gross sales invoice before GST

Expected Result: Trip revenue of **₹14,580.00** is reflected in the enterprise revenue register, attributed to `Kalinga Mining Site` and vehicle `OD-02-AB-4589`.

Next Required Step: Verify client payment and collections reconciliation. Go to Step 15 →

STEP 15: Reconcile Collections & Payment Ledger

SEQUENCE #15

Navigation: Sidebar → Click **Collections** (URL: `http://localhost:3001/collections`)

Action Sequence:

1. Click **Collections** on the left navigation bar.
2. Inspect the **Accounts Receivable Aging** chart (Current vs Overdue).
3. Review payment voucher matching the customer billing balance.

Expected Result: Outstanding accounts receivable shows the active customer invoice balance. Cash received via Wire Transfer reconciles against open ledger vouchers cleanly.

Next Required Step: Check statutory compliance and document expiration alerts. Go to Step 16 →

STEP 16: Monitor Statutory Compliance & Expirations

SEQUENCE #16

Navigation: Sidebar → Click **Compliance** (URL: `http://localhost:3001/compliance`)

Action Sequence:

1. Click **Compliance** on the left navigation bar.
2. Observe the top **Overall Fleet Compliance Score** gauge (e.g. **94% - Green**).
3. Locate truck `OD-02-AB-4589` in the compliance asset table: note that Fitness, PUC, Insurance, and Mining Pass display green **Valid** tags.

Expected Result: Vehicle `OD-02-AB-4589` shows full regulatory health. Any simulated expired vehicle appears in the red *Expired / Urgent Renewal* watchlist.

Next Required Step: Inspect operational reports and system alerts. Go to Step 17 →

STEP 17: Review Operational Reports & System Alerts

SEQUENCE #17

Navigation: Sidebar → Click **Reports** and **Alerts** (URL: `http://localhost:3001/reports`)

Action Sequence:

1. Click **Reports** on the left navigation bar.
2. Select **Daily Tonnage Hauled Report**: verify that `Kalinga Mining Site` displays today's **32.40 MT** haulage progress.
3. Click **Alerts** in the top navigation to inspect the exception console.

Expected Result: Daily reports show accurate cumulative tonnages. The alerts console displays clear notifications with zero unhandled system errors.

Next Required Step: Audit the final Profit & Loss statement for vehicle OD-02-AB-4589. Go to Step 18 →

STEP 18: Audit Single-Truck Profit & Loss (The Final Proof)

SEQUENCE #18 • FINAL AUDIT

> Navigation: Sidebar → Click **Profitability** (URL: `http://localhost:3001/profitability`)

Action Sequence:

1. Click **Profitability** on the left navigation bar.
2. Switch view tab to **By Vehicle**.
3. Locate truck `OD-02-AB-4589` in the profitability table.
4. Verify that every revenue line and cost entry entered in Steps 1–13 reconciles into the net operating profit below:

Financial Line Item	Voucher Reference	Cash Inflow (Revenue)	Cash Outflow (Cost)	Operational Source
Hauling Revenue (32.40 MT @ ₹450)	`TRIP-... / SINV-...`	**₹14,580.00**	—	Step 6 Weighbridge Scale Netting
Diesel Fuel Dispensed (120.0 L)	`FL-2026-00193`	—	₹11,100.00	Step 8 Internal Bowser Fuel Log
Highway Toll & Transit Permit	`EXP-2026-00566`	—	₹1,450.00	Step 12 Operational Expense Entry
